

THINKING OF DOING A PHD?

The Department of Electronic and Electrical Engineering at UCL has a number of fully funded PhD positions available now. If you feel you can rise to the challenge, come and join one of the UK's top three universities.

Our department is one of the leading Electronic & Electrical Engineering departments in the UK, with a vibrant research community. Our research covers the spectrum of EE research from novel materials and devices to nanotechnology, circuits and communications. We have opportunities for excellent students to join one of our internationally leading research teams in the heart of London.

Research projects are available in the following areas:

- **Electronic Materials and Devices**
- **Photonics**
- **Optical Networks**
- **Sensors Systems and Circuits**
- **Communications and Information Systems**

For more details see <http://www.ee.ucl.ac.uk/research/>

Fully funded EPSRC studentships covering fees and living expenses are available now. The current value of the full stipend is £14,622, which is tax free and increases with inflation. These positions are open to UK students and EU students who have been resident in the UK for at least 3 years.

Fees-only awards are available to EU students.

For overseas students, there are a small number of scholarships available - contact us to discuss your options.

To find out more, please contact the department's Postgraduate Tutor, Dr Tony Kenyon (e-mail t.kenyon@ee.ucl.ac.uk).
